

BRUSHFORD PARISH HALL

REGISTERED CHARITY NO: 1176214

Environmental Policy

The Trustees of Brushford Parish Hall are committed to protecting and actively promoting the improvement of the local environment.

We will ensure that environmental priorities are integrated into the decisions we take on all our services and will seek to:

- 1) Make the most efficient use of energy. We will endeavour to use the minimum quantities of energy possible in accordance with the safe and efficient operation of its heating, lighting, plant and machinery. We will, from time to time, review our energy sources, energy using appliances and energy efficiency with a view to causing the least environmental impact. We will monitor consumption and eliminate excessive or unnecessary use. We will communicate to hirers and staff the means by which energy may be conserved, e.g. closing doors, switching off lights.
- 2) Minimise all forms of pollution, using biodegradable chemicals where possible. Users will be encouraged to avoid creating noise pollution, especially at night.
- 3) Use the minimum quantities of water possible in accordance with our activities and ensure that the water used is both supplied and disposed of, in the purest condition possible, meeting statutory requirements. We will reduce leakage and eliminate excessive or unnecessary use. We will communicate to users and staff the need to conserve water e.g. turning taps off after use.
- 4) Avoid waste and encourage the appropriate conservation, re-use and recycling of resources. We will re-use and recycle materials as far as possible and, if this is impractical, disposal by a means which will have the least impact on the environment and conforms to statutory requirements. We will encourage users and staff to minimise waste, including the provision of separate disposal facilities for recycling glass, tins and paper.
- 5) We will ensure that the potential environmental impact of any building projects will be assessed and minimised. This will include, where possible, methods of construction which make best use of resources; designs which result in low maintenance and high energy efficiency and the use of building materials from sustainable sources such as timber. We will encourage volunteers, hirers and staff to use and operate the building correctly to conserve energy and minimise waste.
- 6) Promote a sense of responsibility and understanding for the environment and participation in environmental issues, by raising user and Trustee awareness, by information provision and open consultation with the local community.
- 7) We will seek, where possible, to purchase from local or regional suppliers, in order to maximise input to the local community and minimise carbon emissions from transport.
- 8) Protect the health and well-being of all staff and visitors and improve and safeguard the quality of Brushford Parish Hall.
- 9) Monitor, review and where possible improve performance each year with positive action on any areas of non-compliance.

POLICY APPROVED BY THE BRUSHFORD PARISH HALL TRUSTEES ON 17th February 2022

Date for next review: 16th February 2023
